Dear Day Service Clients and Families

	<p>We wanted to provide an update about day services now that the Government's restrictions are slowly being lifted.</p>
	<p>We know it's been difficult for people who have not been able to attend their usual days services.</p>

Due to the pandemic Tricuro have offered support in a different way, including the use of technology and support in the community.

During the second lockdown, Tricuro, have supported those at most risk with a limited service in day service buildings, as well as supporting people in their own homes and with video calls.

With the government restrictions being gradually lifted, Tricuro will continue to provide building based services, for limited numbers and priority will still be given to those at most risk.

Regrettably, we believe that these restrictions are likely to remain for some weeks or months to come.

However, Tricuro have adapted their services and are able to offer a greater level of community support to meet assessed needs.

This includes community group activities, support at home and support through technology.

If your situation has changed and you require additional support, please talk to a social care officer, call your usual day centre or Adult Access Team on 01305 221016.

Yours faithfully

Kimberley Devlin
Executive Director of Operations
