Dear Day Service Clients and Families

As restrictions are slowly being lifted as part of the Government's Roadmap we wanted to provide an update about day services. We know that the past few months have been incredibly challenging for people who have not been able to attend their usual days services as well as their families and carers.

Due to the pandemic Tricuro have had to offer support in a different way, this has included the use of technology and support in the community.

During the second period of national lockdown, Tricuro, have supported those at most risk with a limited service in day service buildings, as well as supporting people in their own homes and with video calls. With the government restrictions being gradually lifted, Tricuro will continue to provide building based services, for limited numbers and priority will still be given to those at most risk.

Regrettably, we believe that these restrictions are likely to remain for some weeks or months to come. However Tricuro have adapted their services and are able to offer a greater level of community support to meet assessed outcomes, this includes community group activities, support at home and support through technology.

If you feel that your situation has changed and that you require additional support, please make contact with us by either speaking to any social care officer that you are in contact with or your usual day centre or Adult Access Team on 01305 221016.

Yours faithfully

Kimberley Devlin  
Executive Director of Operations
